Pesticide Applications

East Lansing Public Schools addresses pest control through the contractual employ of Rose Pest solutions, Inc.

In our buildings, Rose Pest Solutions, Inc. administers an Integrated Pest Management Program utilizing non-pesticide resources prior to using actual pesticides. Pesticide applications are used only when necessary. Further, when control is required in classrooms or other areas, pesticides will be applied four hours or more prior to any student occupancy as required by State law.

In an emergency, pesticide may be applied without prior notification but parents or guardians will be notified of the application after it occurs if they have so requested.

In addition to the above, East Lansing Public School periodically contracts with certified lawn care companies to provide weed control and fertilization on our athletic fields and building grounds. Parents who so request will be notified of these applications.

If you would like to receive pesticide notifications for the 2017-18 school year, please complete the form below and submit it to the school office or mail it to the address listed above. Requests to receive pesticide notifications will be valid until July 1, 2018.

If you require further information regarding pesticide use in or outside of our school buildings, please contact the Central Administration Office at 517-333-7420.

Pesticide Notification Form

Parent/Guardian Name: _____

Address: _____ City: _____ ZIP: _____
