ASBESTOS MANAGEMENT

The district has taken proactive measures to assure the safety of our students, staff and community with regard to asbestos management. Annually, we must notify the public that the district's asbestos management plan is available for public review. A copy of each building's plan is available for review in the principal's office, and the district plan is available at the Central Administration Office.

If there are any questions on the location of any remaining asbestos-containing building materials, please contact the Central Administration Office, 517-333-7420.
