Habitat

Ravens live in North America and Europe. They live in trees with branches. Also, they need to have leaves in their habitat. The raven lives in mostly cold environments like forests, tundra, savanna, grasslands, and rural cities.

Behavioral Characteristics

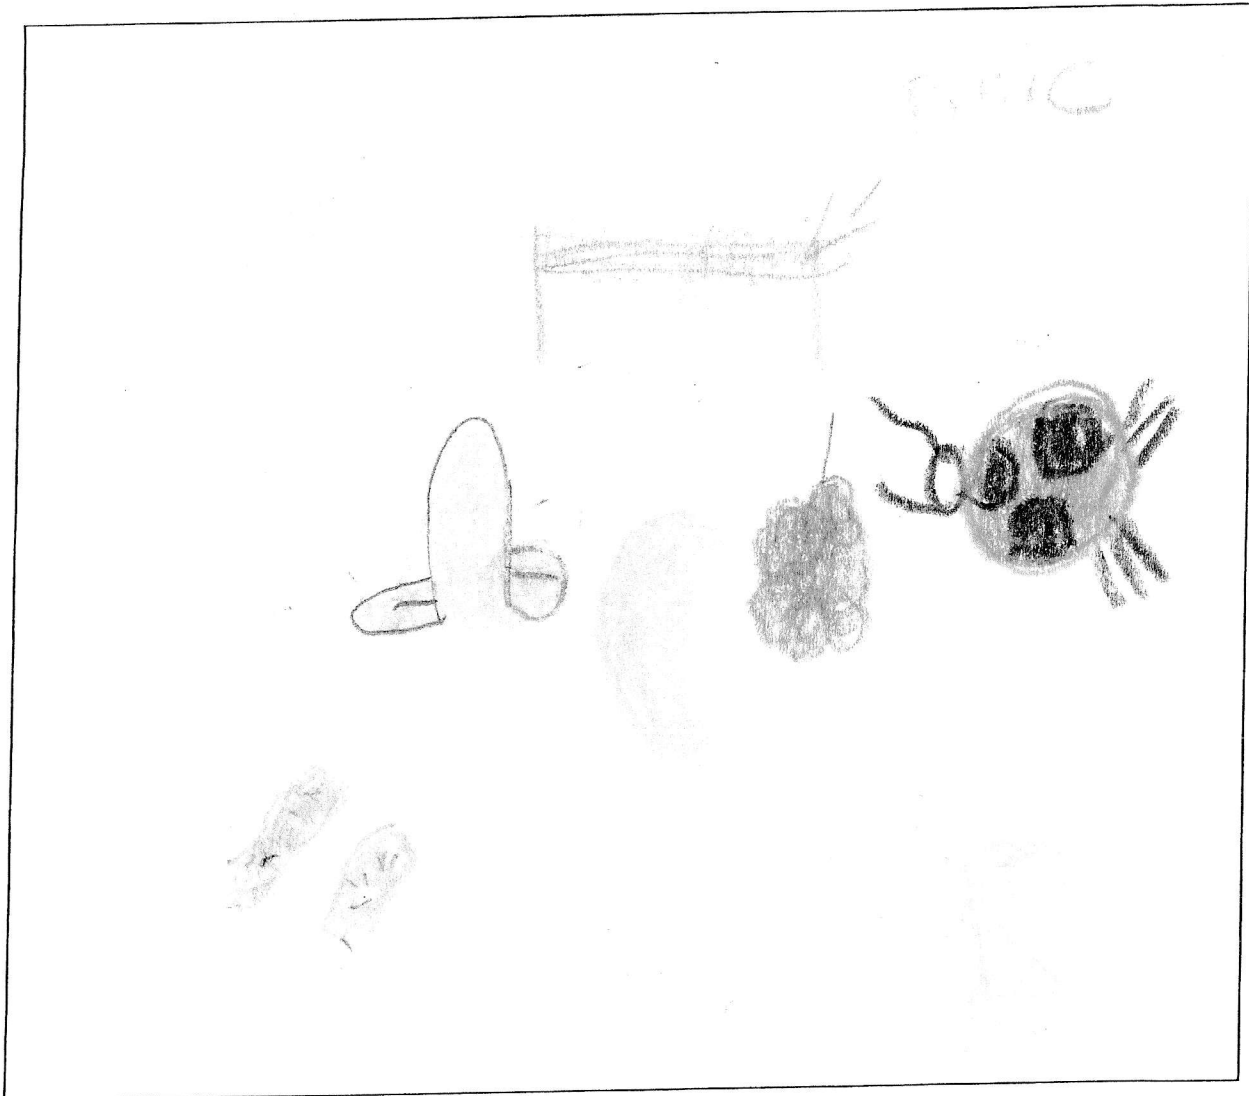

Ravens love digging into the ground. They like it because they can get bugs and worms to eat. Also, they are known for being the more intelligent birds. They can pick up branches with their claws. Ravens will mimic up to 30 sounds including a train sound.

Structural Characteristics

Ravens have very sharp talons to help get their food. Also, Ravens are black everywhere. They have wings & feet to help them soar. Another thing is they have feathers and wedges.

Diet

Ravens eat worms and bugs. Also, they can deal with fruits and grains. Another thing is they eat fish and eggs. They will steal food from picnics. Ravens will almost eat anything they can find.

FUN FACTS

- Did you know ravens will do flips in the air?
- Ravens can live up to 30 years!
