# Habitat

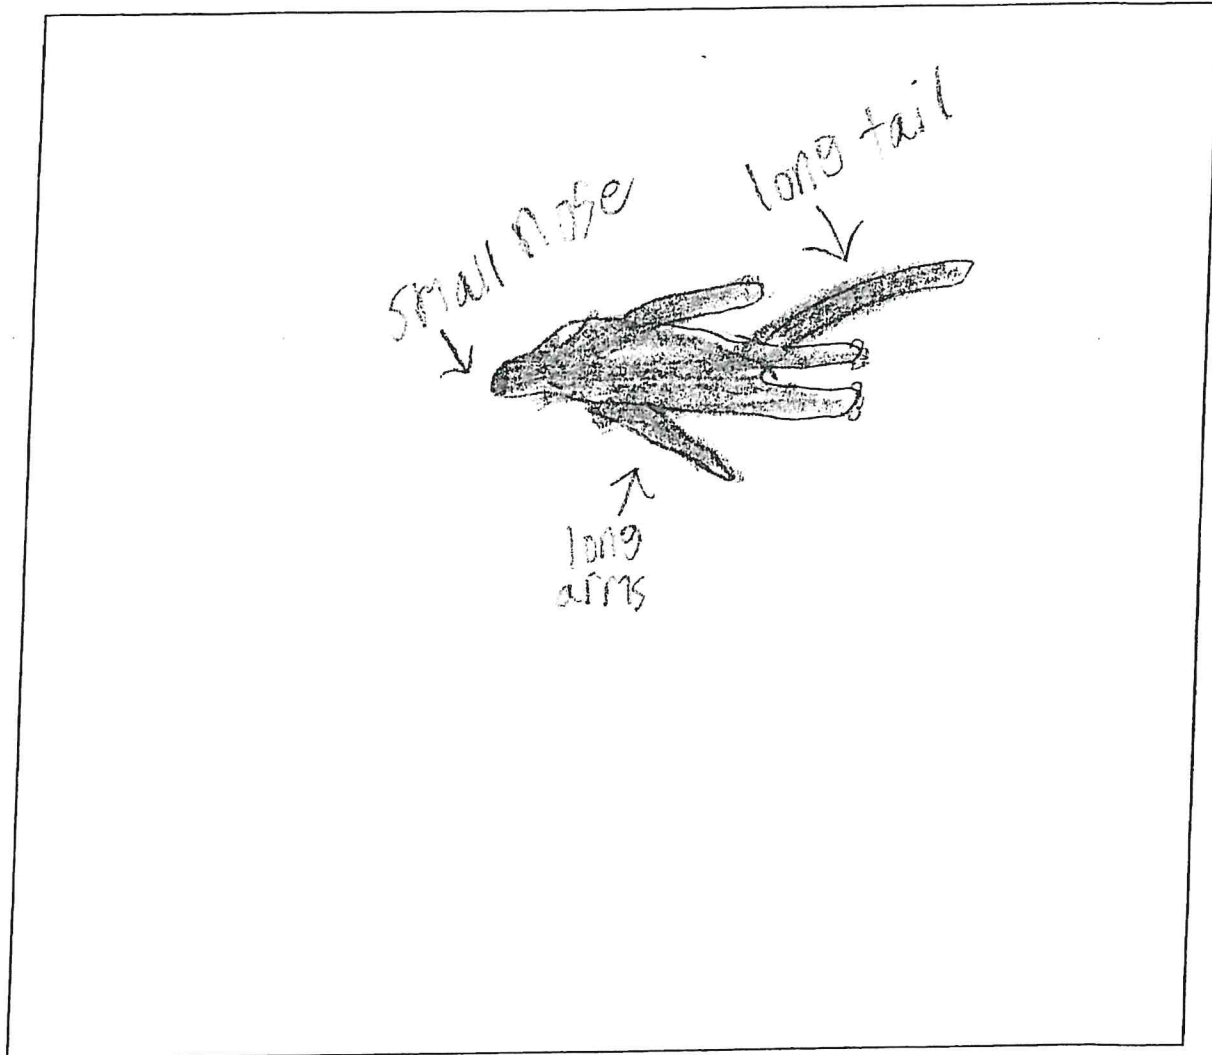

River otters are always found in wet and cold places. They can also be found in rivers, lakes, marshes, and swamps. They like to go to places with permanent food supply and easy access to water.

# Behavioral characteristics

North american river otters  
like to chew on sticks (hard things)  
just like dogs. They mostly hunt  
in the water but sometimes they  
hunt on the shore kind of like  
seagulls.

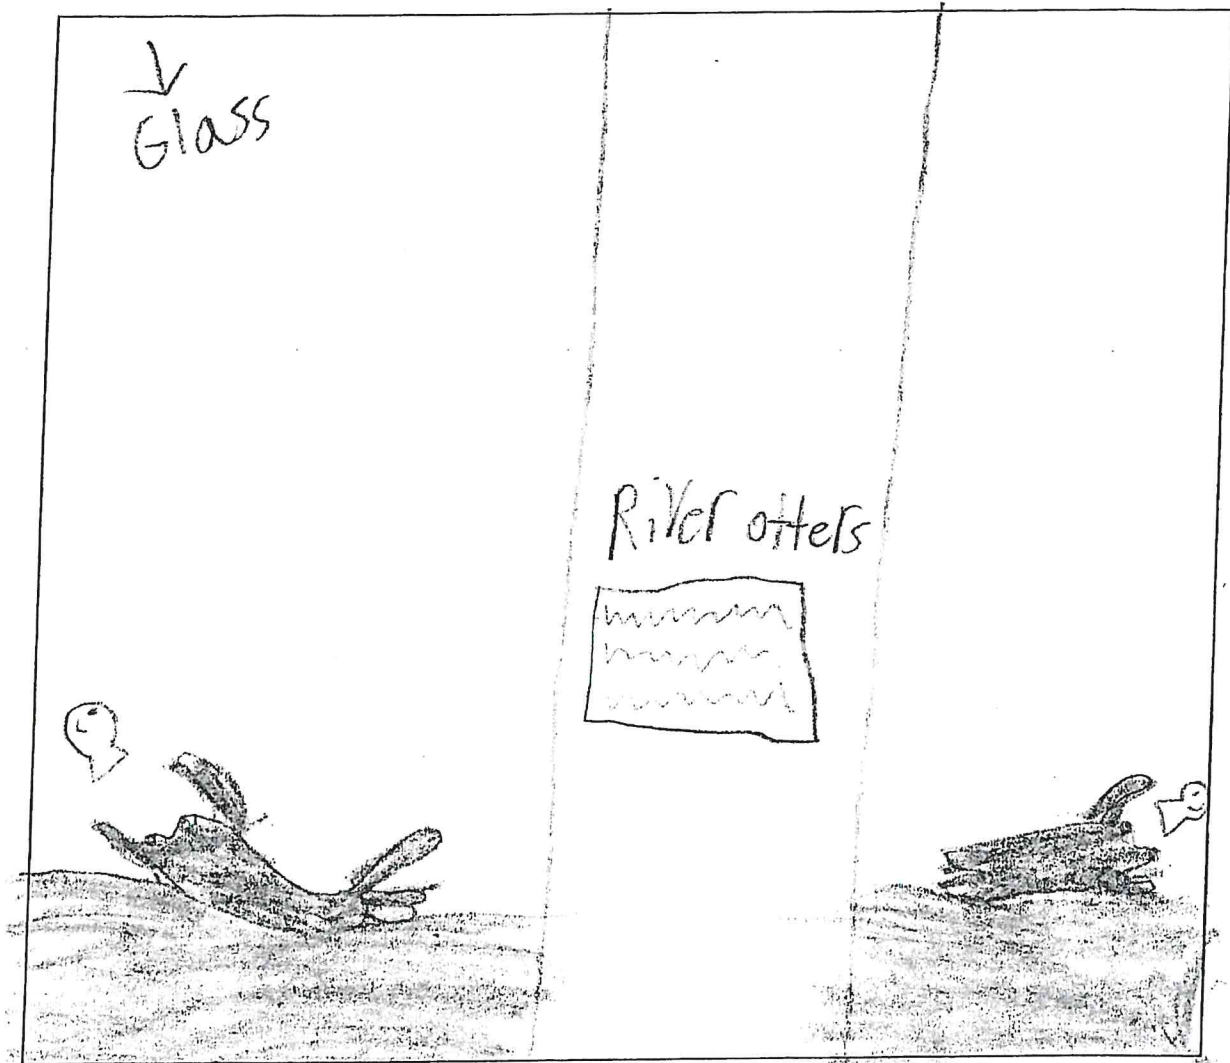

# Structural characteristics

The length of a North American River Otter's tail is usually 16-21 inches, the body length is 10-14 inches and can weigh up to 30 pounds that's alot for an otter. These little brown mammals are cute but they are

Vicious if you mess with them  
or threaten them. North American  
River otters have extremely sharp  
teeth.

# Diet

The North American River Otter's diet in captivity is dog food, horse meat, and fish. The River otter's diet in the wild are fish, frogs, mice, crayfish, and crabs.

# Intresting Facts
